

Dear Parents and Carers,

Every week you will find daily Maths activities to do with your child. They will follow the scheme developed by White Rose Maths and BBC Bitesize so that you can follow along and supplement the learning. I have uploaded the overview of the scheme and for as long as we are off school I will continue to provide resources following this scheme.

As a guide I would advise watching the interactive video first, then the PowerPoint I have made and finally the questions on the PDF. You can print out the PDF for your child to complete or just talk through the questions with them. They may not be able to complete all of it and that is absolutely fine. Do as much as they can manage.

When using the PowerPoints try and play them from the start. Some have animated transitions and will show a question first and then an answer will be revealed afterwards with a click. This won't work if you're not playing the PowerPoint full screen and your child may see the answer too early.

There are also answers provided for each day. Do not feel you have to complete everything. Feel free to use what is provided however you wish and all the resources will remain uploaded so you can go back and forth.

Each Friday there will be a 'Flashback Friday' PowerPoint, which will contain a range of questions based on the learning covered that week.

If you have any technical questions please do not hesitate to get in touch and we will endeavour to help you where we can.

Hoping this all finds you well, and enjoy the learning. Try to make things practical wherever you can, using the topics and questions as a starting point.

Happy learning Bitterns and thinking of you all.

Miss Layton.
